Berkeley Engineering

WaterSeer Collider IEOB 190C

Kickoff:

**Tues, Feb 9,
5:00-7:00 PM
220 Jacobs Hall**

Evite:

<http://evite.me/p1chFXzbdtd>

What can you do to change the world? What would that look like? Can you build it?

Billions of people globally suffer from a lack of clean drinking water and water scarcity for subsistence crops.

WaterSeer™ is a unique proof of concept to accelerate the collection of pure water from condensate. Work with VICI Labs to take this project from proof of concept to working prototype taking into account important design constraints and a buy one / give one business model. Teams compete to win a **cash prize of up to \$12,000!**

Open to graduate and undergraduate students. This is a challenging, team-based design and build project for makers, fabricators, designers, environmental sciences and business majors. If you have questions, contact David Law (dlaw@berkeley.edu). Register for IEOB 190C (CCN 41264) or IEOB 298 (CCN 41177).
