Paid Research opportunity with Berkeley Alt: Meat Lab

Food Chemistry Researcher

We are looking for curious students (preferably graduate) who can work on technical projects on the following three Nestlé challenges in meat alternative research:

- Microalgae and seaweed – functionality and potential for application in plant-based foods
- Protein spinning technologies for fibrous texture formation in plant-based foods
- Sustainability of different alternative protein sources, e.g. plant proteins vs. mycoprotein vs. precision protein

Application open until 8 p.m. 3/10/2021
Graduate and undergraduate students are welcome

Apply at bit.ly/alt-meat-researcher-2021

$25/hr. compensation
4 hours per week
